

About Pricing

We understand the cost of undergoing plastic surgery is a key concern for patients. We are happy to present detailed information about the costs of our procedures as you explore your options. However, we caution you to look at pricing very carefully, especially when comparing between offices. It is critical to know the precise details of the proposed surgery and what is covered in the price quote. Make sure that you are making an “apples-to-apples” comparison when you look at prices.

The experience, skill, results, safety record, and quality of the surgical center provided during your surgical experience are paramount and must be assessed with the greatest of care. Plastic surgery is real surgery and results and experiences vary. More than 6,000 happy Esprit patients know the value we provide. Our patients believe that when their body and life are in the balance, paying for optimal care is worth it.

KEY THINGS TO CONSIDER:

1. The prices presented here are typical costs. Every patient is special, so a guaranteed quote can only be given after a consultation.
2. These prices are for everything and include the cost for the surgeon, surgery center, implants, anesthesia, post-op garments, and pre and post-operative visits. Medications taken at home (which range in cost from \$50-\$200) are not included in these prices.
3. Our breast augmentation pricing rarely varies from the listed price.
4. When comparing breast augmentation prices be sure to compare the same implants, as different implant technologies have different costs.
5. Price ranges are given for many procedures. It is a matter of anatomy and the complexity of the procedure or procedures being performed.
6. We perform combined procedures. Combined procedures costs less than if the procedures are performed separately.
7. These prices are for Dr. Connall. Who is a board-certified, highly respected surgeon, with over 25 years of experience.
8. These prices are for the Meridian Center for Surgical Excellence as the surgery center. Our facility is a top-notch, fully licensed and accredited ambulatory surgery center.
9. Financing through Care Credit is available.

*Prices are estimate ranges only.

Exact pricing for your procedure will be determined when you come in for your consultation.
